Professional Experience

Software Engineer , Prismberry Technologies Pvt Ltd – Noida, UP	Oct 2024 – Present
- Developed and maintained 50+ RESTful APIs using Spring Boot and FastAPI, documented with Swagger/OpenAPI, improving developer onboarding by 40%. Led backend development for VisionIQ, an AI video analytics platform — architected core services, mentored team members, and drove end-to-end delivery of streaming and event-processing modules. - Built responsive frontend interfaces using React with TypeScript, integrating REST APIs and delivering seamless user experiences across multiple product modules. - Designed scalable backend architecture with secure multi-level approval workflows and fine-grained RBAC using Spring Security 6 with JWT authentication. - Built low-latency video streaming using AWS KVS + WebRTC and an async SQS pipeline processing multiple AI detection types concurrently with multi-threaded consumers. - Integrated AWS services (S3, SQS, SES, KVS) and built multi-format reports (PDF, Excel, CSV) with date-range filtering for operational insights and client reporting.	

Technical Skills

Languages: Java, Python, JavaScript, TypeScript, SQL
Frontend: React.js, Next.js, Vite, HTML5, CSS3, Tailwind CSS, Redux Toolkit, Socket.IO, Axios
Backend: Spring Boot, Spring MVC, Spring Security, Node.js, Express.js, FastAPI, REST APIs, Microservices, Hibernate, JPA, MongoDB
Databases: MySQL, PostgreSQL, MongoDB, Redis, VectorDB
AI & LLM: LangChain, LangGraph, OpenAI API, Gemini API, Hugging Face, RAG, Groq AI
Cloud & DevOps: AWS (EC2, S3, SQS, Lambda, KVS), Docker, Kubernetes, Jenkins, GitHub Actions, Linux, Nginx
Tools: Git, Flyway, Swagger/OpenAPI, Postman, Maven, Cloudinary, Apache POI, Kafka, n8n

Projects

VisionIQ Spring Boot, AWS, WebRTC, PostgreSQL, Docker (<i>Lead Backend Developer</i>)	Nov 2025 – Present
- Built an AI-powered video surveillance platform supporting real-time monitoring, safety detection (fire, crowd, PPE, fall), and automated alerts across multiple camera feeds. - Developed live streaming using AWS Kinesis Video Streams + WebRTC and an async SQS event pipeline to process and route 8+ AI detection types with low latency. - Implemented role-based access control, JWT authentication, and real-time analytics dashboard pushed via WebSocket; deployed with Docker and automated CI/CD via Jenkins.	
Zatix Credit Card System Java, Spring Boot, MongoDB, Kafka, PostgreSQL, MasterCard API	Oct 2024 – Mar 2025
- Built a co-branded corporate credit card platform in partnership with multiple banks, enabling card issuance, blocking, tracking, and bulk provisioning with seamless employee expense management. - Implemented real-time transaction and balance tracking with PCI-DSS aligned security, AES + RSA encryption, JWT authentication, and integration with MasterCard and banking APIs. - Designed scalable REST APIs and integrated Apache Kafka for event-driven processing, reducing data sync time by 20% and improving platform functionality across multiple Zagggle products.	
Zivora React.js, Node.js, MongoDB, Socket.IO, Groq AI, Cloudinary (<i>Solo — Full Stack</i>)	Feb 2024 – Present
Solely designed and developed a full stack social media app with user authentication, follow system, private accounts, post creation with image uploads, likes, and personalized feed. - Developed REST APIs with Node.js + Express, MongoDB for data storage, Cloudinary for media handling, and Socket.IO for real-time live notifications. - Integrated Groq AI for AI-powered caption generation and built a responsive React.js frontend with Tailwind CSS, Redux Toolkit, and Vite.	

Education

Chitkara University , Bachelor of Engineering in Computer Science	2021 – 2025
CGPA: 8.67/10.0	
Ryan International School , Class XII – CBSE	2020 – 2021
Percentage: 80%
